Position

Software Engineer Consultant (local) x2

Background

The Civil Service Commission (CSC) of Maldives seeks a dynamic, self-driven, well-organized, and passionate individual to join the information system team. The appointed staff member will collaborate with the software development teams to improve the information system within the Civil Service Commission

Overall Responsibilities

The Software Engineer Consultant will develop new software and develop new software modules for existing software with the software development team at the Civil Service Commission.

Scope of Work

1. Actively engage in the design and development of software to provide quality, high performance, user-centered, and data rich web applications.
2. Develop enhancements to existing software as well as design and develop new software.
3. Write testable, scalable, and efficient code.
4. Review code developed by other developers and provide feedback to ensure best practices (e.g., style guidelines, checking code in, accuracy, testability, and efficiency).
5. Build custom libraries and frameworks required for the development process.

6. Triage product or system issues and debug/track/resolve by analyzing the sources of issues.
7. Participate in continuing education and training to remain current on best practices.
8. Take lead on projects, planning, training, and documenting technical specifications as needed.
9. Collaborate in a team environment to share best practices, implement process improvements, and ensure software quality.
10. Resolve software related issues and provide solutions.
11. Deliver well tested and functioning applications developed for the requirements of the product owner.

Reporting Relationships

The Software Engineer Consultant will report directly to the Director General of Information and Communication Technology, or a person assigned by the Director General of Information and Communication Technology.

Qualification and Experience

- Masters Degree in Information Technology or Software Engineering or Computer Programming or Web and Application Development or Information Systems Management or in the field of Computer Science. And at least 1 years of experience in the relevant field.
- Or a Bachelor's Degree in Information Technology or Software Engineering or Computer Programming or Web and Application Development or Information Systems Management or in the field of Computer Science. And at least 2 years of experience in the relevant field.
